

# Climate Smart Cities

# Are your buildings 'smart'?

# Sustainability – Siemens aims to be net-carbon neutral by 2030

**We are investing over €100 million in measures to reduce our carbon footprint**

#### **Drive energy efficiency program**

Increase energy efficiency in factories, employ sustainable technologies in new buildings

#### **Leverage distributed energy systems**

Reduce energy costs and CO<sub>2</sub> emissions

#### **Reduce fleet emissions**

Utilize potential of low-emission cars in fleet, including electro mobility

#### **Purchase green energy**

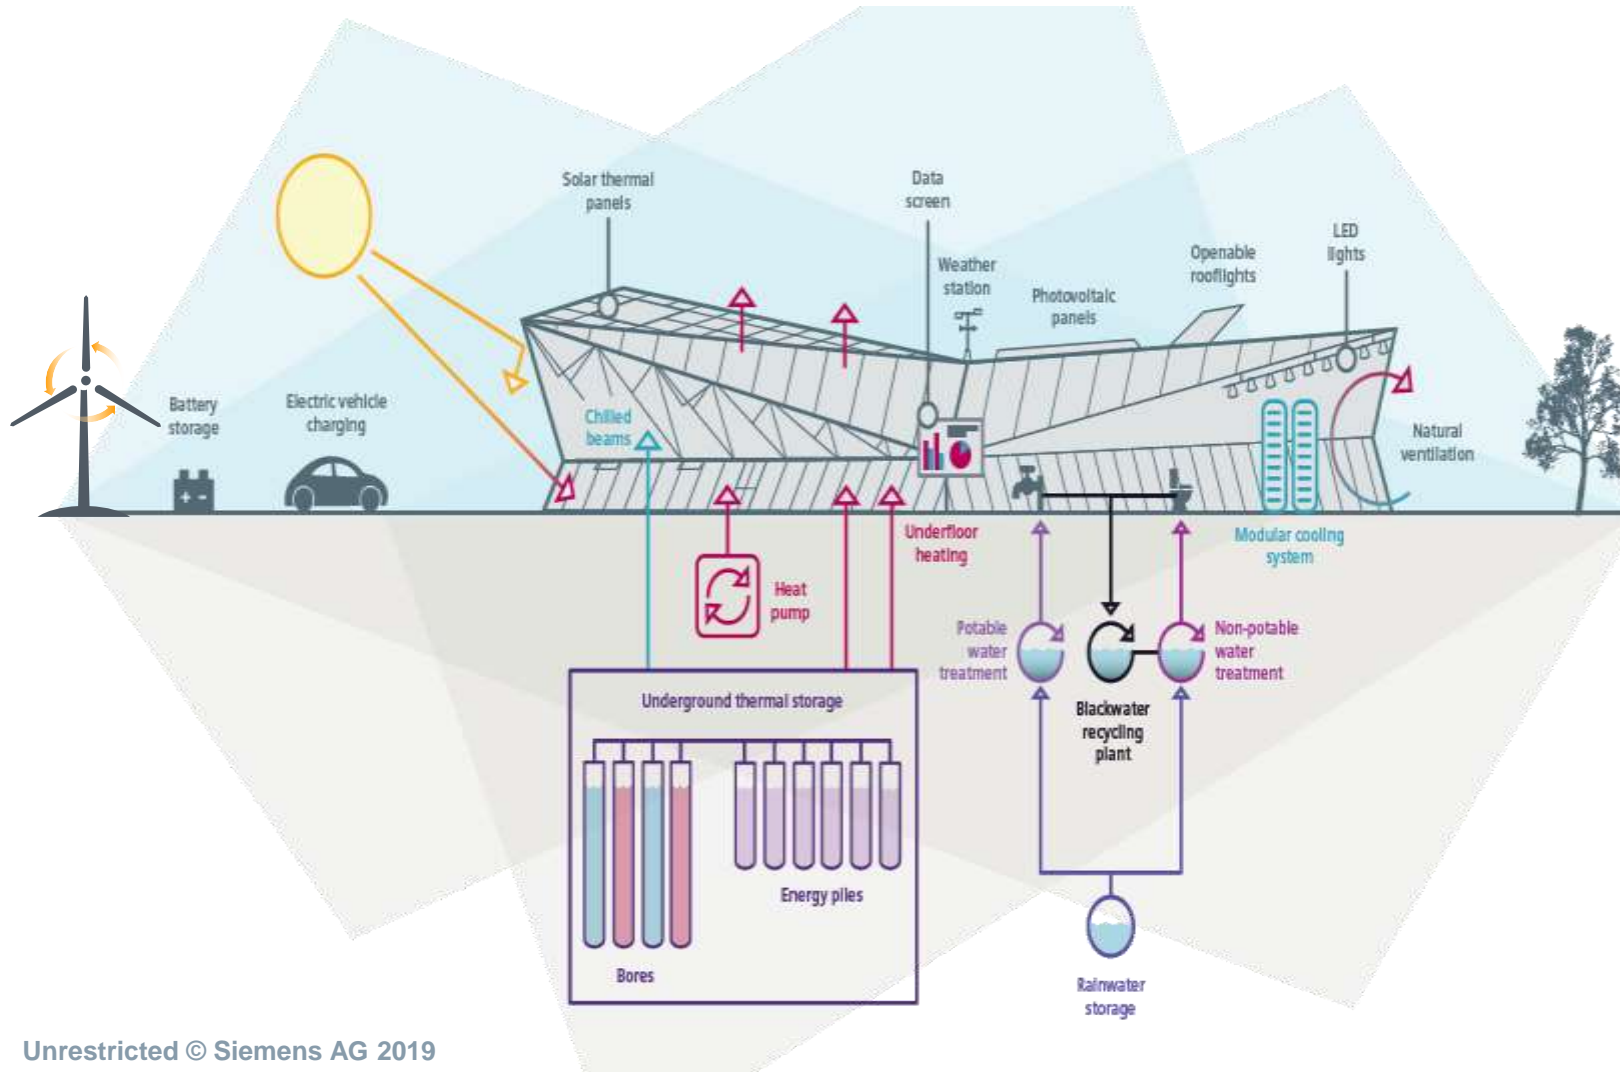

Move toward a significantly cleaner power mix with a strong focus on renewable energy and highly efficient gas

**Independent auditors will monitor and report on progress of implementation.**

# The Crystal

## An all-electric intelligent building

**SIEMENS**

# Sharing Cities: London / Greenwich, Lisbon and Milan

## In summary: 3 calls to action

### 1. Construction Industry / Property owners

- Ensure all your buildings are 'smart'

### 2. Cities / Government

- Set the right vision / policy framework

### 3. General Public / Others

- You all have a part to play!
